Colloquium

Close the Gender Gap in Physics

Prof. Keng-Hui Lin (林耿慧)

Institute of Physics, Academia Sinica

Date: 2025/09/02 (Tue)

Venue: S4-625

Time: 14:00-16:00

Abstract :

Female is under-represented in physics community particularly in east Asian countries, where they also face serious low birth rate and challenge to draw talents in physics. As the first female research fellow at Institute of Physics, Academia Sinica, I would like to provide my viewpoints on why having more women in physics is good for physics and practical actions we can take to increase women in physics. I will address this issue from three levels. At the personal level, I would share useful tips on thriving the graduate school. At the community level, I would like to convince every physics department to make effort to promote networking among female students and researchers. Finally, at the society level, I would like to raise the awareness about unconscious bias and why do we need to take measure at the system to compensate for this effect.

❖ 演講結束後將舉辦座談，備有茶點；歡迎各年級學生與博士後踴躍參與。
